COMMAND PLATFORM

Vehicle Analytics

- Edge-based vehicle detection
- Filter by make, color, and vehicle type
- Search for vehicles across cameras

Quickly Search And Filter To Find Vehicles Of Interest

Vehicle Analytics brings simplicity to vehicle-based investigations. Using powerful edge-based processing and computer vision, footage where vehicles are detected is instantly analyzed and cropped into high resolution images. Customers can then filter vehicles by date, time, vehicle make, color, and body type.

Vehicle Analytics Overview

Filter Vehicles
From Command, users can filter vehicles detected in frame based on make, body color, and body type.

Monitor Anywhere
Vehicle Analytics is available from any device, including computers, mobile phones, and tablets.

Export Footage
All from within Command, users can quickly save thumbnails of vehicles, archive important footage, and export evidence to share with necessary parties.

Contact sales@verkada.com to learn more about Vehicle Analytics and Verkada's hybrid cloud solution.
